## MiTRIX Display

- A Bright LED Screen Solution
- Rugged All-Metal Construction
- Exceptional Colour Uniformity
- Provides Unlimited Design Creativity

MiTRIX Display is a highly transparent, bright and lightweight modular LED screen solution for indoor and outdoor events. MiTRIX can be used in an endless mixture of applications from large format video backdrops for awards shows, corporate presentations and gala dinners to fashion shows, product launches and exhibition stands. With a 24mm pixel pitch and 3000 Nit brightness, MiTRIX sets a new standard of performance in the creative LED display market. Based on the proven Barco OLite LED platform, MiTRIX delivers outstanding image quality and excellent colour uniformity. The small size and low weight in combination with Barco's Director Toolset software enables unprecedented degrees of creative freedom.

Whatever or wherever your event, with our nationwide network of offices we can provide a truly local, national or international solution. Our MCL offices can be found at -
