Versa TUBE

- Scalable to any shape or size desired
- Create striking and dramatic backdrops
- Deliver cost effective eye catching effects
- A robust LED fixture that utilises video content

With the ever growing convergence between LED lighting and video technology, MCL would like to introduce you to our latest innovative modular LED video product, Versa TUBE. Due to its 1m wide modular strips, Versa TUBE can be used to create intelligent lighting effects on backdrops of any form, size or shape while offering the possibility of video driven content. With MCL Versa TUBE you have the opportunity to add dramatic and striking backdrops to any event as this product follows on from our other LED video solutions such as Versa TILE and Stealth, giving MCL the full product range in house. Take your expression and message beyond content, ask MCL about Versa TUBE today.

Whatever or wherever your event, with our nationwide network of offices we can provide a truly local, national or international solution. Our MCL offices can be found at -
